Some of the students of B.Tech III/V/VII are got low percentage in the I Mid term examinations. After having conducted a meeting with the concerned faculty, it has been decided to conduct a bridge course for slow learner students from **13-11-2023 to 18-11-2023** for those students in order to improve their performance in the coming Mid Term Examinations and Annual Examinations. The List of the students for bridge course for slow learners is attached with the notice.

This is for your kind information and due compliance.

TOPICS COVERED FOR SLOW LEARNERS YEAR/SEM: II/I
ACADEMIC YEAR:2023-24

S.NO	SUBJECT	TOPIC COVERED
1	Complex Analysis and Numerical Methods	Functions of a Complex Variables
		Complex Integration & Complex Power Series
		Calculus of Residues
		Interpolation, Numerical differentiation and integration
		Numerical solutions of differential equations
		Runge-Kutta method of 4th order-
2	Electronic Devices and Circuits	PN Junction Diode
		Rectifiers and Filters
		Bipolar Junction Transistor
		Transistor Biasing and Thermal Stabilization
		Small Signal Analysis
3	Probability Theory and Stochastic Processes	Introduction
		Random Variables
		Correlation And Process Determination
		Power Spectrum
		Random Signal Response of Linear Systems
4	Signals and Systems	Signals & Systems
		Continuous Time Fourier Transform
		Convolution & Correlation
		Discrete Time Fourier Transform
		The Z-Transform
5	Switching Theory and Logic Design	Digital Codes and Boolean Algebraic Switching Functions
		Minimization of Switching Functions and Combinational Logic Design
		Programmable Logic Devices and Sequential Circuits
		State Machines: FSMs AND ASMs
		State Machines: FSMs AND ASMs

1	Object Oriented Programming through JAVA	Object oriented Concepts & Basics of Java
		Inheritance, polymorphism, Packages and Interfaces
		Exception handling and multithreading
		Applets and Swing
		Event Handling
2	Electromagnetic Waves and Transmission Lines	Electrostatics
		Magneto Statics
		Maxwell's Equations (Time Varying Fields)
		Em Wave Characteristics
		Transmission Lines
3	Analog and Digital Communications	Amplitude Modulation
		Angle Modulation
		Transmitters & Receivers
		Pulse Analog & Digital Modulation
		Digital Modulation & Baseband transmission
4	Analog Circuit Analysis	Multistage Amplifiers
		Large Signal Amplifiers
		Feedback Amplifiers
		Oscillators
		Tuned Amplifiers and Voltage Regulators
5	Managerial Economics And Project Management	Introduction To Managerial Economics
		Theory Of Production
		Project Management
		Project Identification And Selection
		Strategic Management

		Analog Filters, Timers
		Phase Locked Loops
		D/A And A/D Converters
2	Digital System Design	Introduction To Logic Families
		The Vhdl Hardware Description Language
		Sequential Logic Design
		Combinational Logic Design
		Memories
3	Microprocessors and Microcontrollers	Introduction
		Instruction Set And Assembly Language Programming Of 8086
		Introduction To Msp 430
		Interfacing
		Interfacing With Advanced Devices
4	Antennas and Propagation	Antenna Basics
		Antenna Arrays
		Vhf, Uhf And Microwave Antennas
		Types Of Antennas
		Wave Propagation
5	Control System	Mathematical Modeling Of Systems
		Time Response And Stability Analysis
		Frequency Domain Analysis
		Controllers And Compensators
		State Space Analysis

		Register organization,memory hierarchy,
3	Data base Management Systems	Cache memory,i/o addressing,control unit.
		Introduction to data base design,relational model,
		Data base systems applications,
		Queries,constraints,triggers,
		Implementation of atomicity and durability,
4	Artificial Intelligence	Data on external storage,transaction concept
		Foundations of sub areas of AI applications,
		Introduction to general problem solving
		introduction to representation knowledge,
		Logic concepts,logic programming,
5	Formal language and Automata Theory	Expert system and applications introduction,
		Uncertainty measure,convolution networks.
		Basics of formal
		languages,strings,alphabet,operations,
		Representation of regular expressions,regular sets,
		Pumping lemma,closure properties of regular sets,
		Context free grammar,derivation trees,
		Computer functions,computability theory

TOPICS COVERED FOR SLOW LEARNERS YEAR/SEM: II/II

ACADEMIC YEAR:2023-24

S.NO	SUBJECT	TOPIC COVERED
1	Data Science	Introduction to data science,
		Data merging techniques,
		Data aggregation,
		Rounding number,
		Manipulating data
2	Operating System	Operating system over view,
		Concurrency,Deadlock and starvation
		Processes and Threads,CPU Sheduling
		Memory management,allocation methods
		File management,Protection security
3	Pattern Recognition	Introduction definitions,
		Data sets for pattern,feature extraction,
		Representation of pattern and classes,
		Metric and non metric proximity measures
		Feature extraction,clustering
4	Design and Analysis of Algorithms	Algorithm,space complexity ,time complexity,
		Big O notation,omega notation,theta notation,
		Divide and conquer,disjoint set operations,
		Back tracking,general method,applications,
		Dynamic programming ,greedy method.
5	Engineering Economics and Project Management	Fundamentals of economics,
		Forms of business organization,
		Introduction to management,
		Financial management,
		Marketing management

HOD CSE(AI)

S.NO	SUBJECT	TOPIC COVERED
1	Machine Learning	Introduction to ML, well-posed learning problems,
		Decision tree learning, representation,
		Bayesian learning,
		Computational learning theory,
		Instance based learning
2	Data ware housing and Data Mining	Fundamentals of data mining,
		Data mining functionalities, classification of data, data mining task primitives,
		Data preprocessing, data cleaning,
		Major issues in data mining, data reduction,
		Data warehouse architecture, mining streams
3	Software Engineering	Introduction to software engineering,
		Software engineering paradigms, software metrics,
		Software measurements, project estimation, Risk Analysis, scheduling, Risk analysis, Requirements,
		Object oriented analysis, structure analysis
		Software design fundamental, Quality assurance, software testing and management
4	OOPS through Java	Fundamentals of OOPS, Java evolution,
		Overview of java language, classes, objects and methods, creating objects, constructors,
		Decision making and Branching and looping,
		Interfaces, Packages, Arrays,
		Multithreaded Programming, Collections
5	UHV	Human values and morals, values and ethics,
		Engineering ethics,
		Engineering as social experimentation
		Engineer responsibility for safety and risk
		Global issues globalization

1	Artificial Neural Networks	Basics of Artificial neural networks,
		Characteristics of neural networks,
		Neural network principles,
		Activation and synaptic dynamics,
		Feedforward neural networks.
2	Natural language Processing	Finding structure of words,
		Finding structure of document, methods,
		Syntax analysis, semantic parsing,
		Discourse processing,
		Language modeling
3	Mobile computing	Introduction to mobile computing,
		Introduction to android mobile OS system,
		Android mobile user interface
		Intents and broadcasts,
		Persistent storage.
4	Information security	Introduction to Information security, attacks,
		Security goals, security service and mechanisms
		Cryptographic techniques, DES, AES algorithms
		Authentication and digital signatures,
		Program security, security in networks
5	Predictive modeling and Analytics	Introduction to predictive modeling analytics,
		Introduction to tools and environment,
		Application of modeling in business,
		Logistic regression,
		Objective segmentation.

		Challenges of conventional systems,nature of data,
		Stream processing,stream concepts,stream computing
		Sampling data in stream,Filtering streams,
		Introduction to Hadoop,history of Hadoop,framework and applications.
2	Cloud Based Machine Learning	Introduction to cloud based machine learnig
		Cloud models,Deployment models,
		Clod AI development with amazon webserver,
		Devops on AWS,docker based feedback,
		Cloud development with google cloud platform,creating a bot,AI pipe line for NLP on AWS.
3	AI in Marketing	Under standing the basics of AI in marketing,
		Introduction to AI algorithms,
		Transforming marketing strategy using AI,
		Using AI for STP,
		Applications of AI in marketing
4	Deep Learning	Introduction to deeplearning,Historical trends in deep learning,deep feed -forward networks,

S.NO	SUBJECT	TOPIC COVERED
1	Statistics for Data Science	Basic probability concepts-Probability Spaces-conditional probability
		Discrete & Continuous Probability Distributions
		Testing of significance of single mean & difference of means
		Independence of attributes– student's t-distribution – testing of single mean and difference of means
		Pearson's & Quartile coefficient of skewness; kurtosis.
		ANOVA: One- way & Two-way classifications
2	Python Programming for Data Science	Data types: Python Numbers- Python Strings- Python Lists
		Types of Functions, Flow of Execution
		Operators, Conditional Statements
		List operations, List Slices, List Methods
		Introduction to Files, File Types, Exception-Error
3	Data Base Management System	Basic Concepts Introduction to the Relational Model
		Relational Algebra, Extended Relational Algebra Operations
		Basics of SQL, DDL,DML,DCL,TCL, structure
		Storage and Indexing
		Concurrency control & Recovery System overview
4	Software Engineering	The Capability Maturity Model Integration (CMMI)
		The Agile process Understanding Requirements
		Design Engineering Concepts
		Designing Class-Based Components & Traditional Components
		Black-Box and White-Box Testing
5	Formal Languages and Automata Theory	Basics of Formal Languages
		Pumping lemma of regular sets
		Introduction to DCFL and DPDA
		Church's hypothesis, counter machine, types of Turing Machines

		Process Synchronization & Dead lock concepts
		Virtual memory
		Mass-storage structure overview
		Goals & Principles of protection
2	Artificial Intelligence	BFS, DFS, Iterative-Deepening Heuristic Search Techniques
		Knowledge Representation using Semantic Network
		Machine-Learning Paradigms
		Design Issues of Artificial Neural Networks-Recurrent Networks.
		Semantic Web-Natural Language Processing
3	Computer Organization	Introduction to Sequential Circuits
		Program Control, CISC and RISC
		Memory Organization - Memory Hierarchy
		Floating-point arithmetic operations
		Characteristics of vector processing
4	Computer Networks	Guided Media, Unguided Media,
		HDLC, Point to Point Protocol
		Internetworking, Tunneling
		The internet transport protocols: UDP, TCP, SCTP
		Client Server Programming
5	Design and Analysis of Algorithms	Pseudo code for algorithm
		quick sort, merge sort, Strassen's matrix multiplication

1	Electrical Measurements and Instrumentation	deflecting, control and damping torques
		Single phase dynamometer wattmeter
		Method of measuring low resistance
		Measurement of flux, method of reversals
		Principle operation of LVDT transducers
2	Power System Analysis	Definitions, bus incidence matrix
		Load flow solutions using Gauss Seidel method
		Symmetrical Fault Analysis
		Elementary concepts of steady state
		Derivation of swing equation
3	Power Electronics	SCR, TRIAC, BJT, MOSFET, IGBT
		Halfwave, half & full controlled rectifiers
		operation of TRIAC, AC voltage Regulators
		Choppers classification and their control strategy
		Basic series and parallel inverter
4	Power System Operation and Control	Incremental fuel and Production costs
		Optimal scheduling of Hydrothermal System
		Mathematical Modeling of Speed Governing System
		Necessity of keeping frequency constant
		Specifications of load compensator
5	Python	procedure for executing python program
		Types of functions, flow of execution
		Strings, string slices, immutability, string methods
		types of files ,files operations, error and exceptions
		introduction to packages, regular expressions

Advanced learners 2023-24

Advanced Learners

The term advanced learner in this policy refers to the students who can engage in learning activities faster than the other students and are more potential with their comprehension, retention, memory, critical thinking, and creativity and contextualization practices. They also may have smart working behaviors and can take up higher-level learning and academic responsibilities. They can bring some new concepts, strategies, and also can take the leadership in the teaching-learning activities.
